Project Documentation Phase

Implement Client Script & UI Policy (Incident)

Team ID	SWTID-2026-4280
Team Leader	S. Vembudurai
Team Member	P.Vairamuthu
Project title	Implement Client Script & UI Policy (Incident)

In the documentation phase, I prepared the project details for “Implement Client Script & UI Policy (Incident).” I documented the problem statement, project objectives, ServiceNow features used, configuration steps, and expected system behavior. I explained how I created the “High Impact Control” UI Policy and configured its condition for High impact incidents. I documented the UI Policy Action used to make Urgency read-only, the onChange Client Script used to set Urgency automatically, and the onSubmit Client Script used to prevent submission when Assigned To was empty for a High impact incident. I also documented the onCellEdit Client Script used to restrict direct State changes from the Incident list. In addition, I included the testing procedures and expected outcomes. This documentation provides a clear explanation of the project implementation and how the configured controls help improve the consistency of Incident records.
